What Is Graphiti All About ?

“The goal is the easy creation of underlying graphical models and edit

easy
and edit

Why Should I Want to Use Graphiti ?

Flat learning curve

- Platform specific technology (e.g. GEF / Draw2D on Eclipse) is hidden from developer

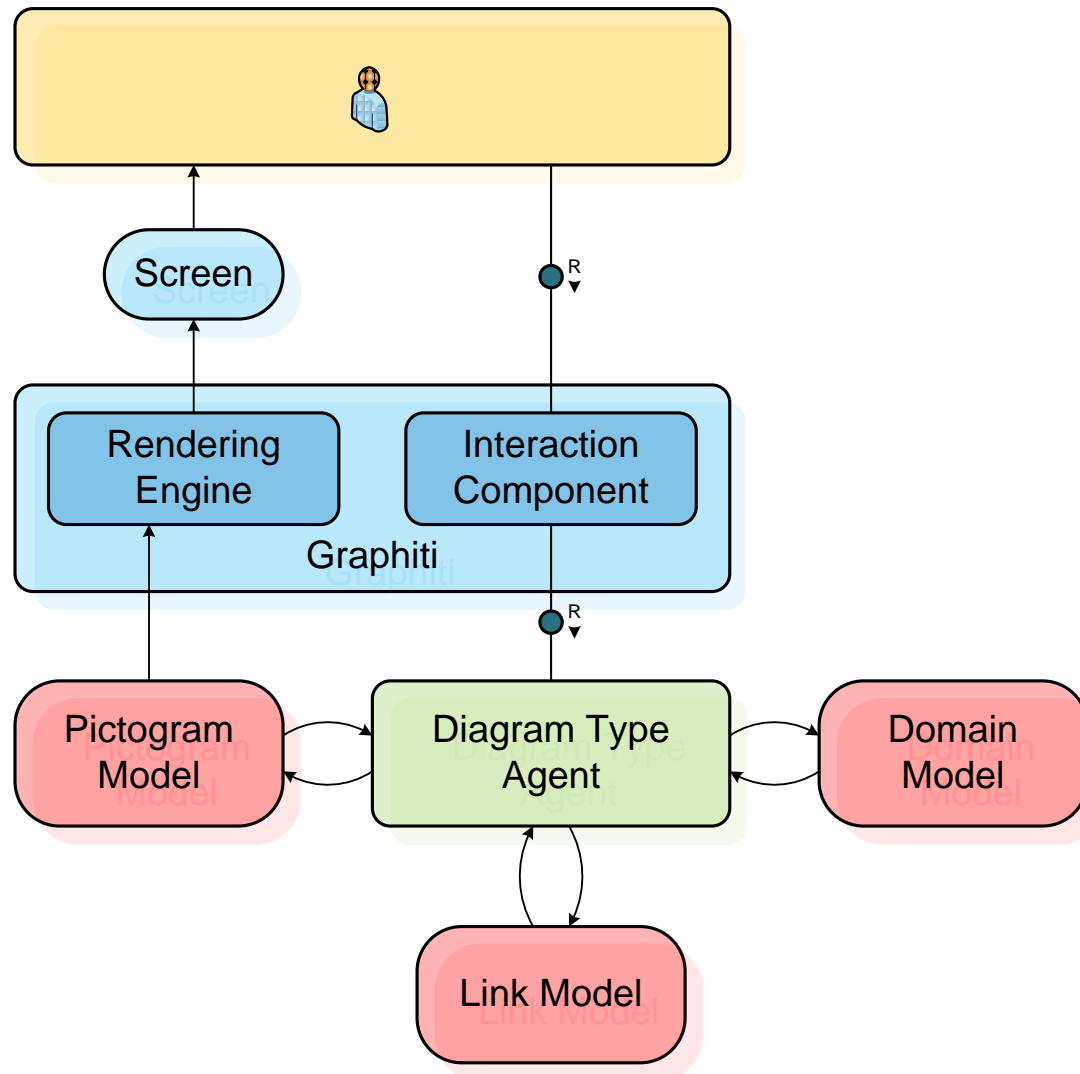

Fast and easy development of graphical editors for all kinds of domain models

- First results with very low effort by using default implementations and strong framework

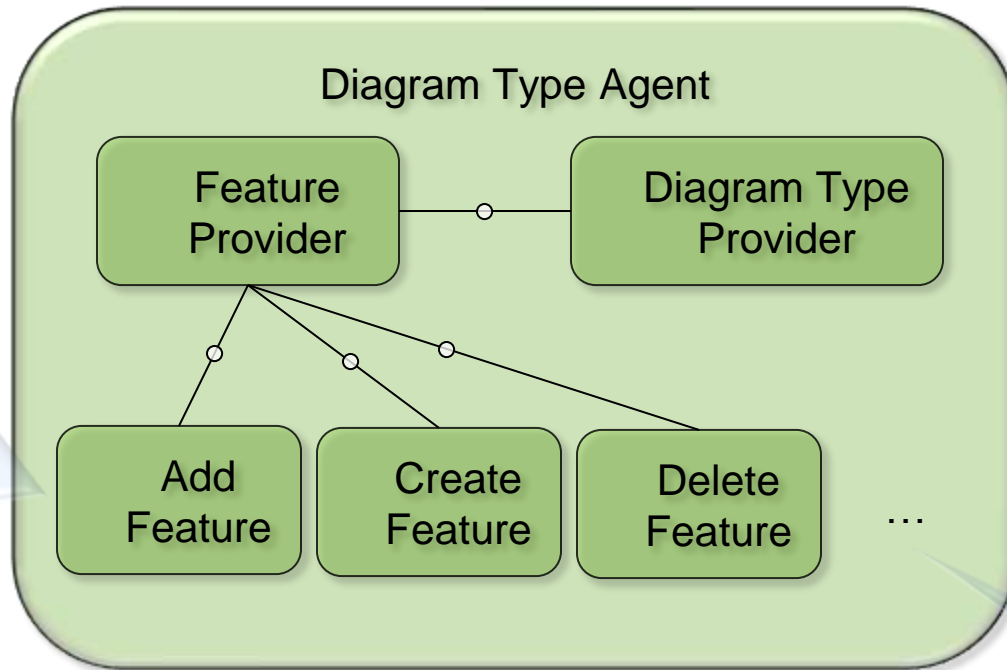

Common look and feel with sensible defaults

- User interactions were designed in close co-operation with usability specialists

How Does Graphiti Work ?

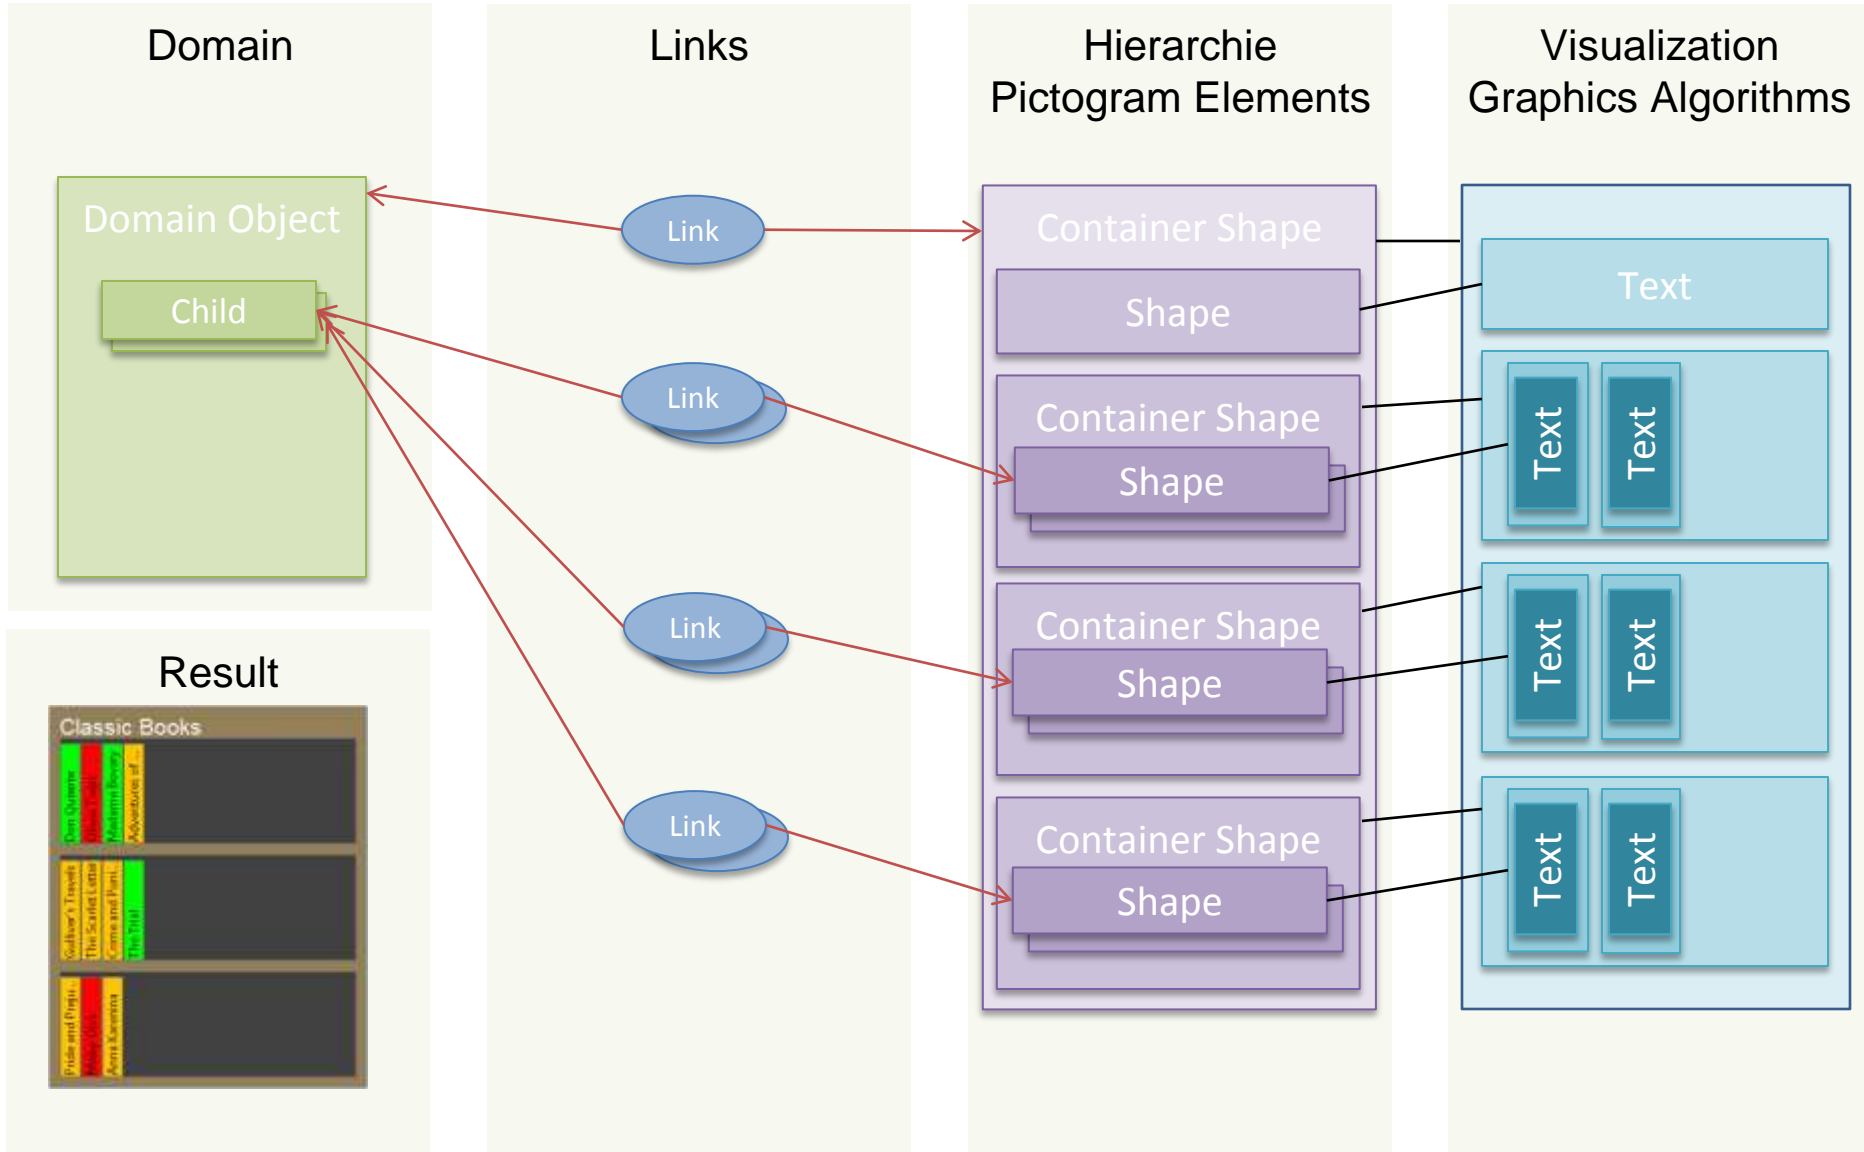

What about the Diagram Type Agent ?

A feature implements an operation for a domain object and defines the context in which the operation can be triggered

Specialized features for common user interactions available

Which Objects Do I Deal with ?
